

**Blanchon**

## **MAINTENANCE GUIDE**

Keep your wood floor  
looking beautiful

# Maintenance products to suit your chosen finish:

- Oiled floors
- Lacquered floors
- Laminate floors
- Vinyl floors or tiles
- Waxed floors

...To give lasting beauty to your floor.

For nearly 60 years, Blanchon laboratories together with professional wood floor fitters, have been carrying out extensive research in the design and development of high-class care products adapted to different wood species.

**Blanchon**

# Several precautions...

10 days

Leave the original finish until completely dry (lacquer or oil) for 10 days after application.

Regular care: dry clean using a vacuum cleaner or sweeper.

Put a carpet or a doormat at the entrance to avoid scratches.

Use suitable felt pads under the legs of furniture and chairs.

Use as little water as possible to clean the floor, and use tools which are properly wrung out.

Do not use strong detergents containing ammonia, abrasive or silicone detergents.

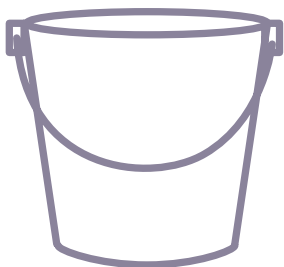

# Recommended TOOLS

## A microfibre mop or a microfibre cloth

- Easy and quick application
- Does not leave marks and standing water on the parquet

You can wash the microfibre in a washing machine

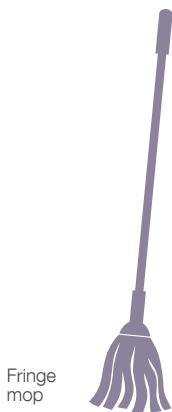

## Bucket

- For diluting products or to rinse tools in clean water

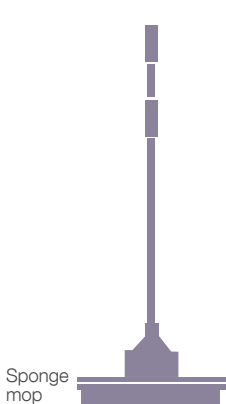

Use warm water to achieve more effective cleaning

## Use tools which are clean and properly wrung out

If you do not have a microfibre mop or cloth, you can also use an ordinary mop, a sponge mop or a fringe mop.

Fringe mop

Sponge mop

Ordinary mop

# All surfaces

## ■ Daily cleaning

### Lagoon™

- You can also spray the Lagoon™ directly on to the microfibre.

- **Universal proprietary cleaner.**

- **Ready for use.**

- **Can be applied on all surfaces**

(except for waxed floors):

lacquered and oiled floors (finished either by the producer or end-user), Laminate or plastic floors.

- **Protects the original appearance of the floor.**

- No streaks.

- Available in a 0.5L **spray bottle** and a supplementary 2.5L **refill**.

#### Instructions for use:

1. Vacuum the floor (with a vacuum cleaner or a sweeper).
2. Spray the Lagoon™ preparation directly onto the surface, then wipe it with a microfibre cloth. Repeat the action on the entire surface.
3. No rinsing required. Leave to dry.

# Laminate, lacquered and plastic floors

## ■ Clean Regularly

### Cleaner Lisabril™

- **Degreases**, cleans and leaves clean and streak free surfaces.
- **Refreshes** lacquered floors with the following finishes: gloss, satin, matt, ultra matt, raw wood, natural and invisible effect.
- **Keeps the metallised polish layer** without damaging the lacquer.
- **It protects the original appearance** of the floor.
- Does not leave a slippery coat.
- Ideal for gyms and sports centres.
- **Available pack sizes: 1L and 5L.**

#### Instructions for use:

1. Dilute 2 cups of the preparation (100 ml) in 5 litres of warm water.
2. Apply across the surface using a properly wrung out microfiber cloth or mop.
3. Leave to dry for 15 minutes.

- Perfect for large areas
- No rinsing required

## ■ Deep cleaning and degreasing

### Remover

- **Powerful and effective cleaner.**
- Eliminates dirt resistant to traditional cleaners: black marks left by footwear, grease stains...
- Restores the original appearance of plastic floors and ceramic tiles.
- **Available pack sizes: 1L and 5L.**

#### Instructions for use:

1. Dilute 2 cups (5 to 10%) in 5 litres of hot water.
2. Clean using a properly wrung out microfibre.
3. Rinse carefully twice with clean water.

- 2 in 1 Product:  
2 possible uses depending on strength used

If your floor shows **signs of wear** (dullish appearance, small scratches), you can **renew it easily** using a **metallised polish**.

## ■ Protects and renews Protector

- **Protects and maintains the original appearance** of the floor by giving a protective coat.
- **Gives a uniform appearance** to worn and dulled parquet floors.
- **Removes small scratches.**
- **Does not leave a slippery coat, silicone free:** anti-slip properties certified by NF EN 13036-4.
- You can use rooms shortly after application.
- **Available pack sizes: 1L and 5L.**

**SATIN FINISH:**  
It revitalises gloss and satin finishes

**OR**

**MATT FINISH – MÉTAMAT®:**  
for matt finishes and for finishes like raw wood and natural wax appearance. It can reduce the sheen of some finishes.

### Instructions for use:

1. The floor must be clean and dry.
2. Apply 1 or 2 layers of **Protector** using a properly wrung out microfibre.
3. Wait 1 h before applying subsequent coats.

## ■ Preparation for a metallised polish Remover

- **Gentle coat remover.**
- **Removes old metallised coats** back to the original lacquer.

### Instructions for use:

1. Dilute 4 cups of the liquid (10 to 20%) in 5 litres of hot water.
2. Apply using a properly wrung out microfibre. Or use a buffing machine equipped with abrasive pads (green or black).
3. Leave the preparation on the surface for several minutes.
4. Collect the dirt and carefully rinse twice with clean water.

- **Extends the life of the lacquer especially in areas exposed to heavy use**

**Stripping before metallisation:**

# Oiled floors

## ■ For regular cleaning

### Natural soap

- Formulated for regular cleaning of all oiled floors.

  3. Leave to dry for 15-20 minutes.
- Rinse the nozzle of the spray bottle thoroughly in clean water after every use.

- Easy spray application
- Dries very quickly: 15-20 minutes

## When should you maintain or renovate the surface?

**Maintenance:** It is important to regularly care for oiled floors, whenever they lose their natural gloss and when you notice: a dulled surface, natural wear, small scratches, etc.

**Renovation:** : if any part of the floor is significantly worn: stubborn stains, scratches, wood damage, **it is recommended to recoat** using the original oil after first sanding the affected area (with fine grit sandpaper) to avoid differences in colour.
