

Heavy Duty Cleaner

Wood and plastic floors

2 uses:

1 - Strips metallised and self-shine polishes

2 - Eliminates grease and dirt

Does not affect wood floor lacquers

(do not allow the POLISH REMOVER to stay on water-based wood floor lacquers)

Lightly scented

Remover

PRODUCT DESCRIPTION

- BLANCHON REMOVER is a powerful degreaser that removes the most stubborn stains.
- It eliminates successive layers of metallising coating and all types of self-shining polishes on a lacquered wood floor before the application of BLANCHON PROTECTOR (satin or matt), or prepares for a 1st metallising coat on an old tarnished wood floor, without affecting the lacquer.
- It is also ideal for stripping plastic floors and dirty tiles.

SURFACES

- **Lacquered floors***: water- or solvent-based.
 - **Plastic floors**: strips self-shining polishes on plastic floors.
 - **Hard floors**: cleans tiles, stone flooring, marble, epoxy and polyurethane flooring.
- *On pre-varnished wood floors, carry out a test on an inconspicuous area before treating the whole surface.

DIRECTIONS FOR USE

Intensive cleaning

- Dilute 2 glasses (5 to 10%) in 5L of hot water.
- Clean with a well-wrung microfibre mop, sponge mop or floor cloth.
- Rinse thoroughly, twice, with clear water, making sure the equipment is damp, not soaked.

Stripping metallised polish

- Dilute 4 glasses (10 to 20%) in 5L of hot water.
- Apply with a well-wrung microfibre mop or floor cloth. It is possible to use a rotary machine like a floor buffer fitted with abrasive pads (red or green).
- Leave it to act for a few minutes.
- Remove traces with a vacuum cleaner or a squeegee, then with a microfibre mop.
- Rinse thoroughly, twice, with warm, clear water, making sure the equipment is damp, not soaked.
- The REMOVER does not lather and can be applied manually or using a machine.
- **IMPORTANT: in all cases, you should avoid getting lacquered floors too wet, and ensure they are completely dry before applying BLANCHON PROTECTOR.**
- Never mix with another product.
- NB: it is recommended to perform an initial rinsing with water with a little white vinegar to neutralise the alkalinity of the product.

Cleaning of tools

- Clean tools with water immediately after use.
- Re-seal carefully after use. Do not discharge the residue into drains.

COVERAGE

- **Intensive cleaning**: 1L of REMOVER = approx. 500 m².
- **Stripping metallised polish**: 1L of REMOVER = approx. 250 m².

SAFETY INSTRUCTIONS

- Use only in well-ventilated areas.
- Wear gloves and goggles.
- In case of contact with the eyes, rinse thoroughly with clear water and consult a doctor.
- Avoid contact of the POLISH REMOVER with bleach.
- Keep out of reach of children.
- Do not discharge the residue into drains.
